

HERBACEOUS PERENNIALS, BOG & MOISTURE LOVING PLANTS

For perennial borders & pond side planting.

Bog and moist soil plants are marked with ^ for identification purposes.

From the old fashioned Victorian favourites to the latest introduction from different breeders in the U.K. and across Europe and America, we have chosen what we consider to be a very fine collection of plants.

Our collection consists of **14 different varieties of Achillea**, **19 different Agapanthus**, **12 different Euphorbia**, **Delphinium society un-named new seedlings**, **70 different Hardy Geraniums**, **46 different Iris**, **180 Papaver orientale**, **25 different Primula**, together with all manner of plants that we consider to be Garden worthy. Happy Browsing!

Details of the New Super Poppy from America

They are an F4 Perennial Hybrid that have taken over 30 years to develop. What's so special about them? The flowers last longer, & they flower over a much longer season. Mature plants will give a second & third flush of flowers from May to September or maybe October, depending on the season, dead head them as soon as the flowers drop.

Colours range through the spectrum from palest pink & white, through to the maroon & purple, from clear, clean long flowering orange, to dark red with a touch of white at the base. They are hardy but do not like overly wet sites.

PAPAVER 'SUPER POPPY'	F4 HYBRIDS. Hardy Perennials.
